JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# **The Journal of Philosophy Psychology and Scientific Methods**

---

There is no similar journal in the field of scientific philosophy. It is issued fortnightly and permits the quick publication of short contributions, prompt reviews, and timely discussions. The contents of the last five issues are as follows :

---

## **Volume IX. No. 2. January 18, 1912**

The Aims and Methods of Introduction Courses : A Questionnaire.

JAY WILLIAM HUDSON.

The New Realism and the Old. W. P. MONTAGUE.

Discussion : Opposition as Condition of Consciousness; JULIUS PIKLER.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

## **Volume IX. No. 3. February 1, 1912**

Doctrine of Specific Nerve Energies. J. W. BRIDGES.

Is Inversion a Valid Inference? L. E. HICKS.

Societies : New York Branch of the American Psychological Association.

H. L. HOLLINGWORTH.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

## **Volume IX. No. 4. February 15, 1912**

On Definitions and Debates. JOSIAH ROYCE.

Societies : Eleventh Annual Meeting of the American Philosophical Association. H. A. OVERSTREET.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

## **Volume IX. No. 5. February 29, 1912**

The Problem of Knowledge. NORMAN KEMP SMITH.

Discussion : Bergson's Anti-Intellectualism. JOHN E. RUSSELL.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

## **Volume IX. No. 6. March 14, 1912**

The Concept of Immediacy. B. H. BODE.

What Kind of Realism? DURANT DRAKE.

Discussion : Explicit Primitives. A Reply to Mrs. Franklin. WARNER FITE.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

---

**THE JOURNAL OF PHILOSOPHY  
PSYCHOLOGY AND SCIENTIFIC METHODS**

**Sub-Station 84, New York City**

---

**3.00 per annum (26 numbers)**

**15 cents per copy.**

# EUGENIO RIGNANO

## On the Inheritance of Acquired Characters

AUTHORIZED TRANSLATION

By BASIL C. H. HARVEY, University of Chicago.

With an additional chapter on  
The Mnemonic Origin and Nature of Affective  
Tendencies

Pp. 420. Cloth, \$3.00 net (12s. 6d.)

### TRANSLATOR'S PREFACE

"RIGNANO is a student of Biology who has also the training of an engineer and physicist. He has studied biological problems thoroughly from that standpoint. He offers in this book an explanation on a physical basis of assimilation, growth, cell division and differentiation, ontogeny and the biogenetic law of recapitulation, and he suggests a mechanism whereby the inheritance of acquired characters may be affected.

Such a study of the most fundamental and difficult of biological problems could not fail to be of the greatest interest to all students of science. To discover the essential nature of living matter Biology needs the help of Physics and Chemistry. Therefore the translator has gladly consented to prepare for publication this translation first made for his own satisfaction. It has been revised by the author.

*University of Chicago, 1911.*

BASIL HARVEY.

"Some deny flatly the possibility of ever arriving at an understanding of the nature of life. But if we ask ourselves in what this understanding of the nature of life could consist, from the point of view of positive philosophy, we have no difficulty in recognizing that such an understanding must be reduced to comparing vital phenomena with some physico-chemical model already known, suitably modified by the particular special conditions imposed upon it so that just these special conditions shall determine the differences which exist between this vital phenomenon and the phenomenon of the inorganic world most closely related to it. If this be so, it is then the duty of science emphatically to reject such a denial of scientific thought as would be constituted by the renunciation of the quest of this understanding. Whether one clearly recognizes it or not, it is just this search for the nature of the vital principle which properly constitutes the principal object and the final goal of all biologic study in general."—*E. Rignano, in 'Acquired Characters,' p. 334.*
